HONORS & ACHIEVEMENTS

- Selected as **Section Leader for Stanford's Code in Place 2025** [\[Digital Credential\]](#)
- Participation in **RAISE YOUR HACK 2025** [\[Participation Certificate\]](#)
- Participation in **Genesis AI Hackathon 2025** [\[Participation Certificate\]](#)
- Solved all 9/9 puzzles at **CS50x Puzzle Day 2025** as part of a team [\[Puzzle Certificate\]](#)
- Received **Letter of Acceptance from FH Upper Austria – Hagenberg Campus** as a competitive applicant (grant not awarded) [\[Acceptance Letter\]](#)
- Led as **Instructor for Python Training Session under GDGoC** [\[Experience Certificate\]](#)
- Completed **Machine Learning Internship** at **National Centre for Physics** in 2024 [\[Internship Certificate\]](#)
- Organizer at **Artificial Intelligence Conference and Expo (AICE) 2024** [\[Organizer Certificate\]](#)
- Won **Best Project Award** at 6th URAAN Project Exhibition among 40+ entries [\[Award Letter\]](#)
- Worked as **Web Application Developer** at Agriculture Extension Office Haripur in 2023 [\[Experience Letter\]](#)
- Awarded for securing **First Position in 12th Grade** by APSACS in 2021 [\[Result Certificate\]](#)
- Led as **Volleyball Team Captain** in 10th Grade, 2019 [\[Leadership Proof\]](#)

EDUCATION

Pak-Austria Fachhochschule [\[Bachelor's Transcript\]](#) Sept. 2022 – Jun. 2026
Bachelor of Science in Computer Science CGPA: 3.8 Class Rank: 03/120 Mang, Haripur

- 4× Dean's List award for academic excellence
- 1× Rector's List honoree (top 1% of students)
- 5× 100% Merit-based Scholarship recipient

EXPERIENCE

Pak-Austria Fachhochschule : Institute of Applied Sciences and Technology Sept. 2024 – Present
TEACHER ASSISTANT Mang, Haripur

- Maintain records of student progress, attendance, and assignments.
- Evaluate and provide feedback on student assignments under the teacher's guidance.
- Facilitate communication between teachers and students to address academic needs

National Centre for Physics [\[Experience Certificate\]](#) July 2024 – August 2024
Machine Learning Intern Islāmābād, Pakistan

- Demonstrated proficiency in Python, utilizing it extensively for data analysis and model development.
- Designed, implemented, and trained deep learning models using Convolutional Neural Networks (CNNs) and Artificial Neural Networks (ANNs) to enhance system performance.
- Leveraged pre-trained models such as ResNet, VGG16, and VGG19 to accelerate development and achieve high accuracy in various machine learning tasks.
- Utilized YOLOv5 for image detection projects, significantly advancing object detection accuracy in challenging datasets.

VOLUNTEERING

Google Developer Group on Campus [\[Community Page\]](#)

Oct. 2024 – Present

Co-Lead

Mang, Haripur

- Coordinate with volunteers and co-organizers to manage event logistics and ensure smooth execution.
- Maintain communication with the GDG central team, ensuring alignment with broader objectives and submitting impact reports.
- Personally conducted technical workshops on Python and AI for university students.

Stanford Code in Place [\[Digital Credential\]](#)

Apr. 2025 – Jun. 2025

Section Leader (Volunteer Instructor)

Remote

- Selected among thousands of applicants to volunteer as a Section Leader for Stanford University's Code in Place program.
- Taught fundamental Python programming concepts to a diverse group of global learners through weekly Zoom sessions.
- Provided personalized feedback, graded assignments, and fostered a supportive learning environment.

PERSONAL PROJECTS

Healthcare Translation Web App with Generative AI [\[Github Link\]](#)

Apr. 2025

- Built a multilingual healthcare communication tool to bridge language gaps between patients and medical providers.
- Integrated **Azure's Translation Services**, **OpenAI GPT-3.5 Turbo**, and speech recognition to deliver real-time transcription and translation of patient speech.
- Enabled live translated audio output for improved accessibility in multilingual medical environments.
- Gained practical experience working with **Microsoft Azure** services in a full-stack production environment.

Flower Species Classification Using DenseNet201 [\[Github Link\]](#)

Mar. 2025

- Developed a deep learning model using **DenseNet201** with transfer learning to classify 102 flower species from the Oxford 102 Flower Dataset.
- Preprocessed and organized the dataset using custom Python scripts (`sorted.py`, `split.py`) to label and split images into training and validation sets.
- Demonstrated strong model generalization and performance on test images using **TensorFlow** for inference and evaluation.

Web Application for Agriculture Extension Office, Haripur

Nov. 2023 – Feb. 2024

- Developed a web application for Agriculture Extension Office Haripur to replace paper-based data collection with a digital solution accessible via mobile phones.
- Deployed the application on a VPS server, ensuring global accessibility while restricting access to authorized employees only.
- Created a supervisor dashboard to enable monitoring of employees' performance, tracking the number of farmers assisted and the data collected on specific dates.

INTERNATIONAL HACKATHONS

LeCommis – AI-Powered Meal Planner (lablab.ai -Raise Your Hack) [\[Submission\]](#) July 2025

- Built **LeCommis**, an AI-powered meal planning assistant that generates personalized recipes based on users' nutritional profiles, dietary preferences, and allergies.
- Implemented dynamic meal suggestion logic using AI to provide three optimized recipes per meal, complete with ingredients, prep time, and nutrition facts.
- Integrated grocery ordering functionality by identifying nearby stores and auto-placing ingredient orders for delivery or pickup.

InboxIQ – AI Email Triage Assistant (lablab.ai - AI Genesis Hackathon) [\[Submission\]](#) May 2025

- Collaborated with an international team across multiple time zones to develop **InboxIQ**, an AI-powered email triage assistant.
- Implemented backend logic to organize, prioritize, and suggest responses for incoming emails using large language models.
- Gained hands-on experience in integrating AI into productivity workflows to solve real-world email management challenges.

CS50x Puzzle Day 2025 – Harvard University [\[Certificate\]](#) May 2025

- Participated as part of a team in Harvard's **CS50x Puzzle Day 2025**, solving all 9 out of 9 challenging logic puzzles.
- Collaborated on analytical problem solving and pattern recognition to complete puzzles under time constraints.
- Demonstrated strong teamwork, critical thinking, and communication skills in a high-pressure academic environment.

SKILLS & INTERESTS

Web Development: JavaScript, Python, React, Node.js, Express.js, FastAPI, HTML, CSS, REST APIs

Machine Learning: Scikit-learn, CNNs, Transfer Learning, Data Preprocessing, Model Evaluation

Deep Learning: TensorFlow, Keras, PyTorch (beginner), Transformers

Generative AI: OpenAI GPT APIs, LLMs, Groq, Prompt Engineering

Databases: MongoDB, MySQL, SQL, PostgreSQL, Firebase, Supabase

Cloud & DevOps: Microsoft Azure, VPS Deployment, Git, GitHub, Postman

Tools: VS Code, Google Colab, Jupyter, LaTeX

Interests: Teaching, Chess, Book Reading, Community Building, Productivity Tools, Hackathons
